Rania Haroon

Junior Software Engineer (TypeScript, Node.js, PostgreSQL)

rania.haroon.jobs@example.com | +92 301 5550142 | Lahore, Pakistan | https://github.com/rania-haroon-example | https://rania-haroon.example.com | https://www.linkedin.com/in/rania-haroon-example

SUMMARY

Junior software engineer with two years of production work on TypeScript and Node.js services and React front ends. Most comfortable close to the database: schema design, migrations, and the slow query nobody else wants to look at.

SKILLS

Languages & runtimes: TypeScript, JavaScript, Node.js, Python, SQL
Data & infrastructure: PostgreSQL, Docker, Docker Compose, Linux
Frameworks & tools: React, Fastify, Express, Jest, pytest, Git

EXPERIENCE

Junior Software Engineer — Tessellate Labs

Jul 2023 – Present · Lahore (hybrid)

- Built and maintain the invoicing service (Node.js, TypeScript, PostgreSQL) that issues about 9,000 invoices a month for the company's logistics clients.
- Cut the nightly reconciliation job from 41 minutes to 6 by replacing row-by-row updates with set-based SQL and adding two partial indexes.
- Moved four services from a hand-built VPS setup to Docker Compose with health checks; wrote the runbook the on-call rotation now uses.
- Built the React (TypeScript) admin screens for refunds and credit notes, including role-based access checks on the API side.
- Reviews pull requests for the billing team and paired with two interns through their first month.

Software Engineering Intern — Kestrel Analytics

Jun 2022 – Sep 2022 · Lahore

- Wrote Python scripts that cleaned and loaded retail sales CSVs into PostgreSQL for the analytics team (about 2 million rows a week).
- Added unit tests to the ingestion scripts (pytest), raising coverage of the loader module from 0 to 71%.

PROJECTS

ledger-lite https://github.com/rania-haroon-example/ledger-lite
A small double-entry bookkeeping API in TypeScript (Fastify, PostgreSQL).
- Enforces balanced journal entries with a database constraint
- Trial balance endpoint
- 140 GitHub stars

chai-check https://github.com/rania-haroon-example/chai-check
A browser extension that flags insecure form actions (HTTP, mixed content) on pages you visit.
- Built while working through the PortSwigger Web Security Academy

Bus Tracker Lahore https://rania-haroon.example.com/bus-tracker
A React + Leaflet map of Metro Bus stops with estimated arrival gaps from public timetables.
- About 300 monthly users

EDUCATION

Bachelor of Science, Computer Science — Lahore Institute of Computing

2019 – 2023

CGPA 3.4 / 4.0. Final-year project: offline-first attendance app for rural schools (React Native, SQLite).
